## Subject Index

- Acetylhydrazine, 291  
Adhesion, 361  
  of bacteria, 175  
Adsorption, 79, 93, 311, 361  
Aging of bonds, 107  
Air/water interface, 335  
1-Alkanols, 281  
 $\alpha$ -Amino acids, 311  
Aquatic systems, 255  
Aqueous suspensions, 189  
Aromatic alcohols, 349
- Bacteria, adhesion, 175  
Bacteria-latex interaction, 175  
Bilayer lipid membranes (BLM), 335  
Brownian dynamics, 143
- Chemisorption, 291  
Coagulation, 255, 273  
Colloid, 79, 93  
  particle deposition, 1  
Colloidal deposits, 143  
Colloidal particle, 39  
Computer simulation, 143
- Deep-bed filtration, 207  
Deposition, 39, 53, 79, 93  
  of particles on collectors, 1  
  process, 127  
Detachment of deposits, 239  
Dipalmitoylphosphatidylcholine, 361  
Double-layer role in particle deposition, 1
- Electric double layer, 53  
Electric field, 189  
Electrolytes, 107  
Electron microscopy, 361  
Electrophoresis, 273  
Electrostatic, 273  
Electrosteric, 273
- Fibres, 207  
Fibrous media, 189  
Filtration, 53, 189, 255
- Galactocerebrosides, 335  
Groundwater aquifers, 255
- Happel's free surface model, 207  
Hematite, 303  
Hydrodynamic forces, 127  
Hydrodynamic interactions, 127  
Hydrophobic side chains, 281
- Interparticle interactions, 127  
Iron oxide, 303
- Kinetics of particle deposition, 1
- Lakes, 255  
Latices, 273  
Lipid bilayers, 335  
Liposome, 361  
Lithium 12-hydroxyoctadecanoate, 321  
Lubricating greases, 321
- Magnetic field, 161  
Mass transport, 107  
Metal(II) chlorides, 291  
Microstructure, 321  
Mineral suspensions, 227  
Mobile adhesion of bacteria, 175  
Model systems, 161  
Monolayers, 281, 335  
1-Monooleoyl-glycerol, 335  
1-Monostearoyl-glycerol, 335
- Palmitic acid, 361  
Particle adhesion, 161  
Particle deposition, 1, 107, 207, 255  
Particle detachment, 107  
Particle-particle interaction, 255  
Particles, 53, 79, 93
- Phase transition, 361  
Polyelectrolytes, 107  
Polymer, 79, 93, 273  
Polymers, 107  
Polypeptides, 281  
Pulp fibers, 39
- Reductive dissolution, 303  
Removal of particles, 127
- Sand grains, 239

- Secondary minimum in bacterial adhesion, 175  
Silica, 291  
Simulation of aggregation, 143  
Slimes coating,  
    control of, 227  
Sodium cholate, 349  
Sodium deoxycholate, 349  
Specific capacitance, 335  
Specific resistance, 335  
Spreading isotherms, 335  
Stabilization, 273  
Stagnation point flow, 107  
Steric, 273  
    interactions, 79, 93  
Structure, 143  
Surface blocking, 127  
Surface chelate, 303  
Surface complex, 303  
Surface potential, 161  
 $\text{TiO}_2$  particles, 311  
Transmission electron microscopy, 321  
Volmer adhesion isotherm, 175  
Zeta potential, 53
